

TASK : Drill-Through & Report Interactions

Part 1: Drill-Through Detail Page

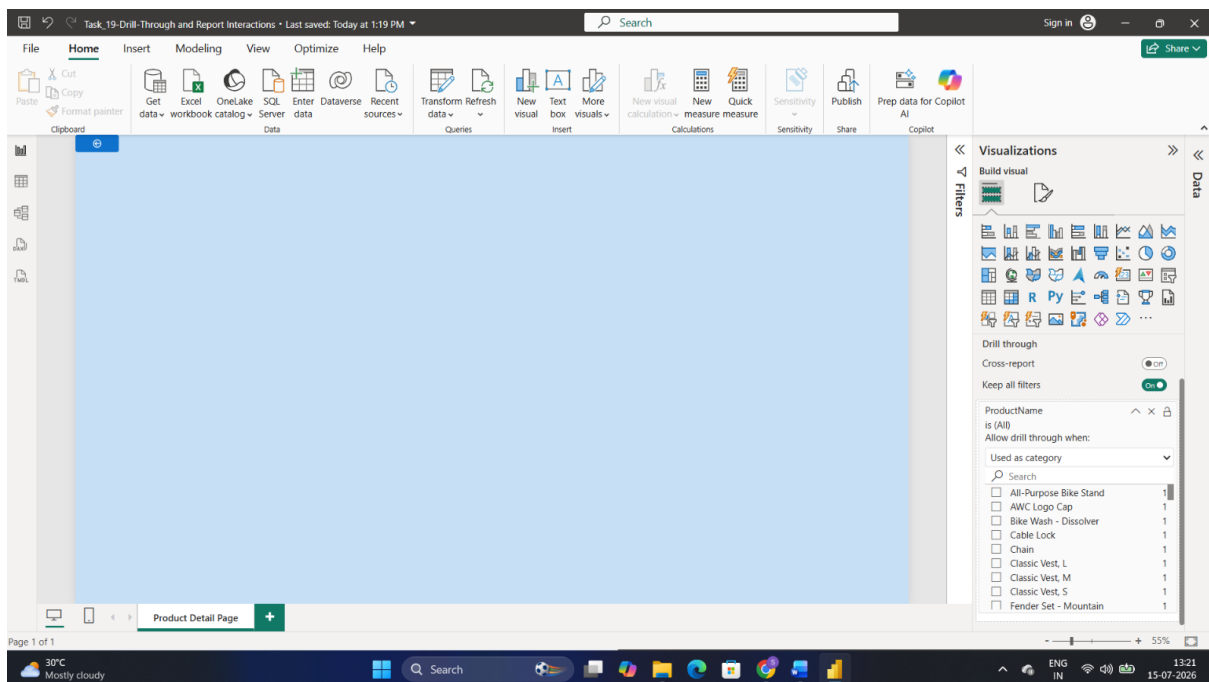

Step 1: Create Drill-Through Page

Create a new report page named:

Product Detail Page

Enable Drill-Through using:

- Product Category or Product Name

Step 2: Add Drill-Through Visuals

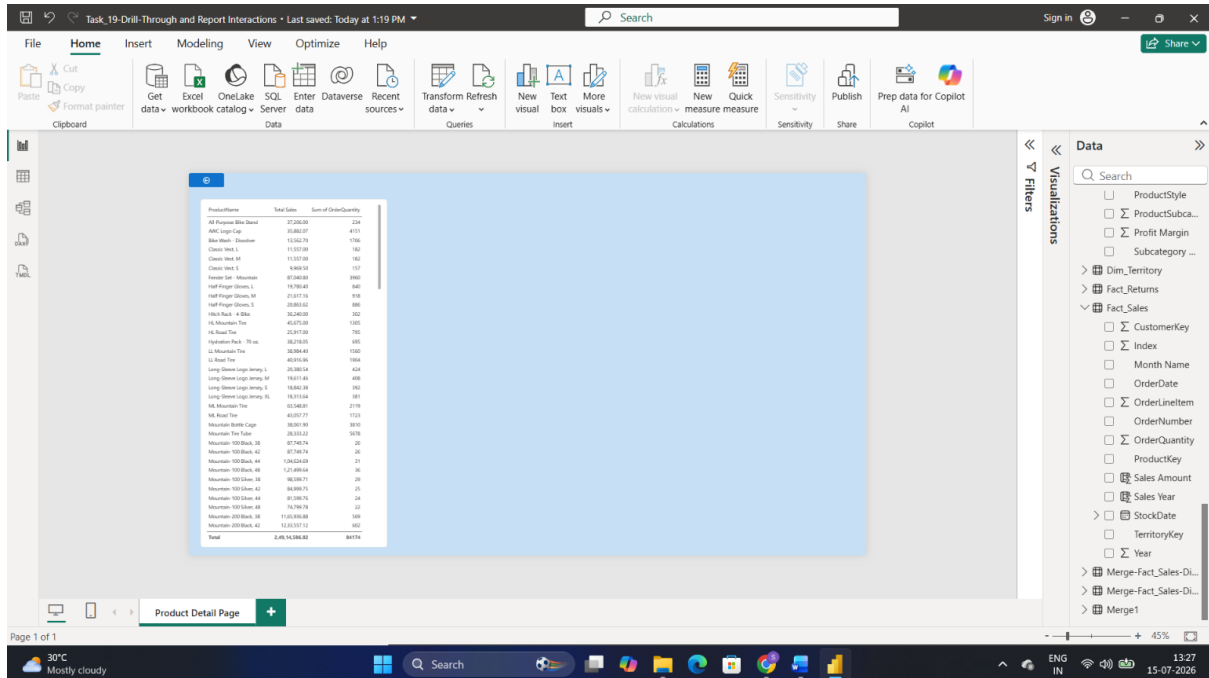

Add visuals to the drill-through page:

- Table or Matrix showing:
 - Product
 - Total Sales
 - Order Quantity
- Optional chart:
 - Sales by Year or Month

TASK : Drill-Through & Report Interactions

Ensure:

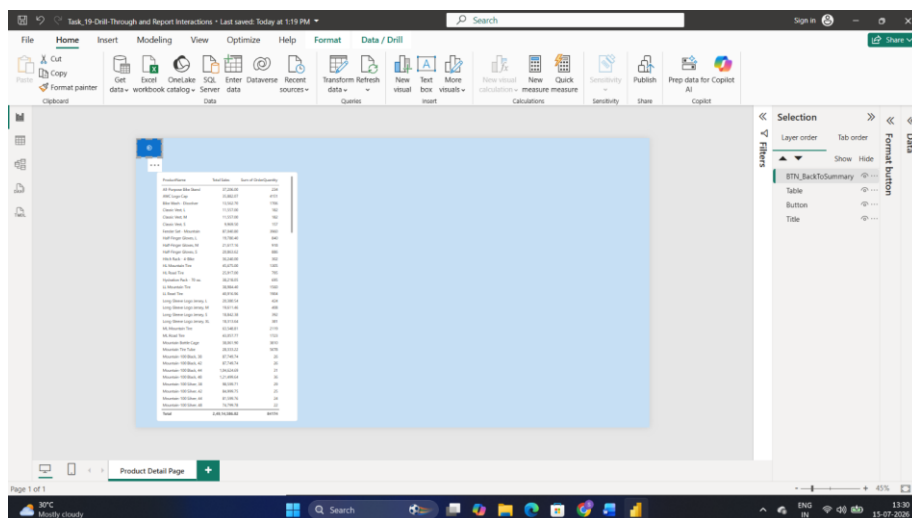

- Drill-through filter pane is visible
- Page clearly indicates it is a detail page

Step 3: Add Back Button

Insert a Back button.

- Enable Action → Back
- Rename button: **BTN_BackToSummary**

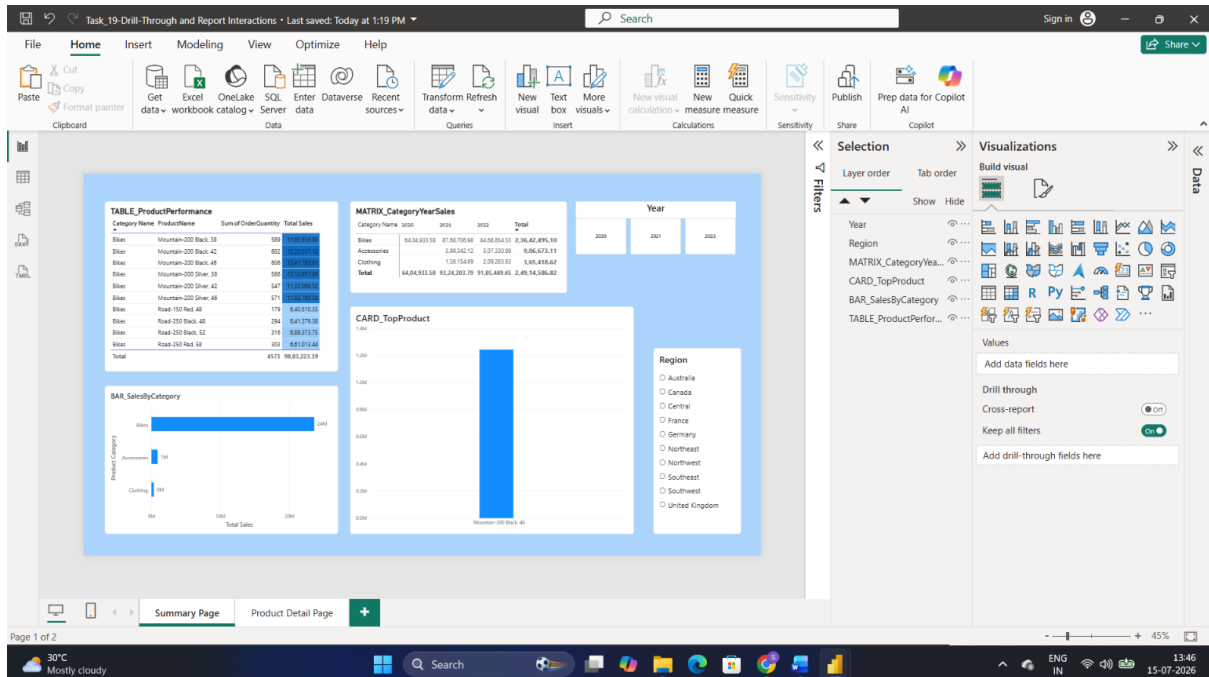

TASK : Drill-Through & Report Interactions

Part 2: Report Interactions Control

Step 4: Create or Use Summary Page

Use an existing dashboard page or create one with:

- Chart (Bar / Line / Area)
- Table or Card

Step 5: Manage Report Interactions

For selected visuals:

Turn interaction **ON** for:

- Key comparison visuals

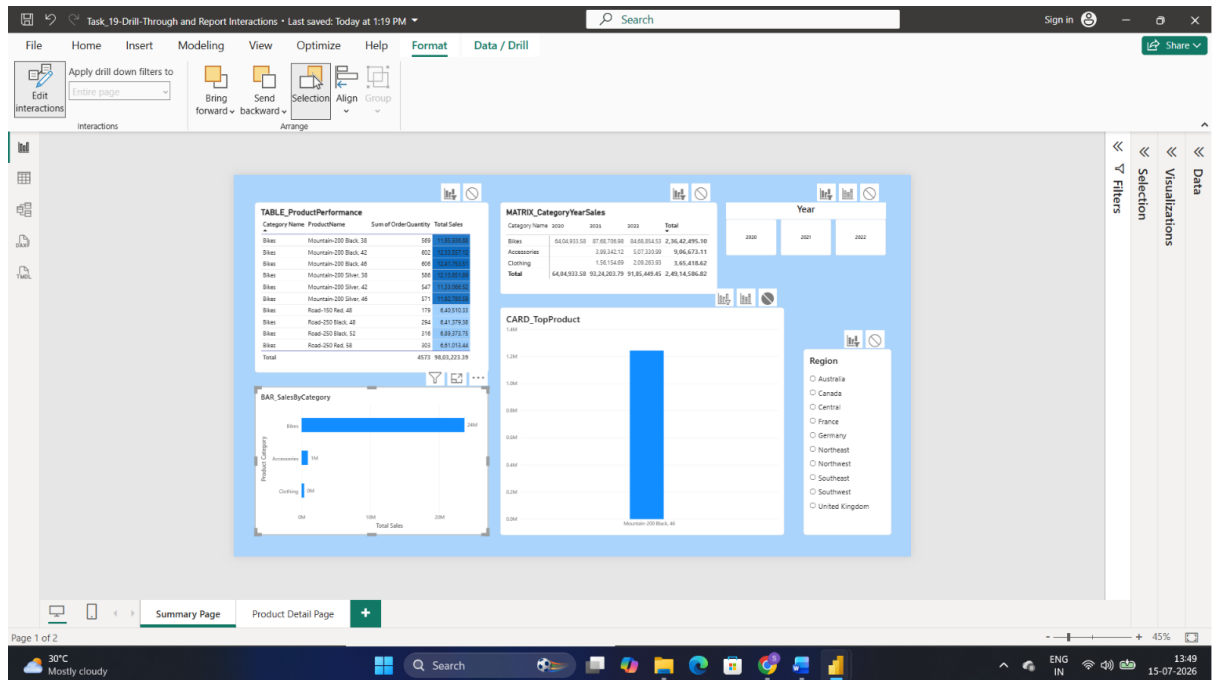

Turn interaction **OFF** for:

- Summary KPI cards (if present)

Ensure:

TASK : Drill-Through & Report Interactions

- Some visuals filter others

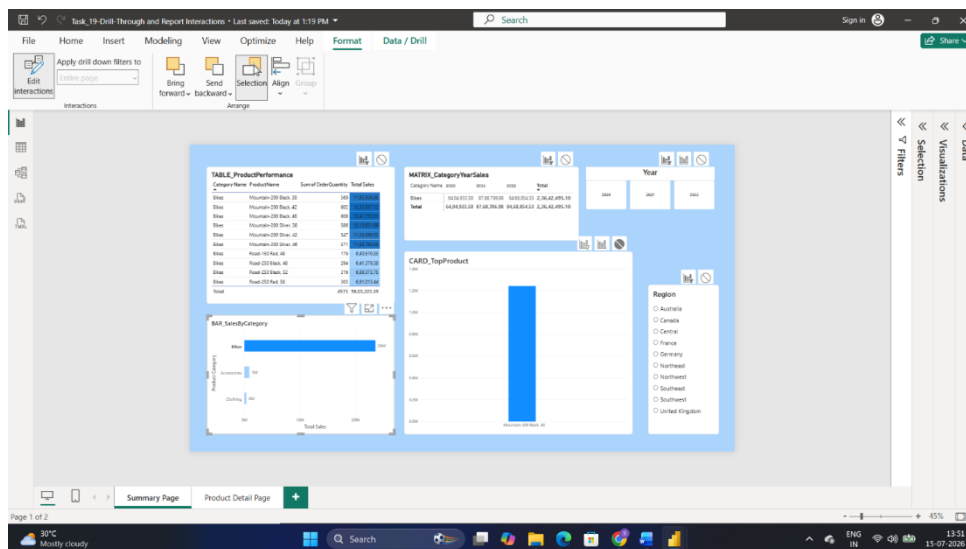

- Some visuals do not respond to clicks

Step 6: Interaction Validation

Validate:

- Clicking a chart filters correct visuals
- Non-interactive visuals remain unchanged
- Drill-through works only from allowed visuals
